

## Project #1

Due: Friday, January 21, 2011

Choose three assignments, lab reports, or papers of yours from the Fall 2010 semester and retype them using  $\text{\LaTeX}$ . You will receive three assignment grades for this work. Here are the stipulations on the items that you choose.

1. At least one of your write-ups must contain a bibliography with at least two references.
2. At least one of your write-ups must have some sort of table or matrix.
3. At least two of your write-ups must contain some sort of technical writing.
4. All three write-ups should be *substantial*. I don't have a specific number of pages in mind, but all of them must be more than one page.
5. All of your write-ups must be approved by me in order to count for this assignment. You must gain my approval by 5:00 p.m. on Wednesday, January 19.
6. If you do not have enough assignments or papers of your own that satisfy conditions (1)–(4), then you must go to the library and find some. These also must be approved by me. I would really like you to retype your own work, so please view the library materials as a last resort.
7. You must turn in hard copies of the retyped documents as well as complete photocopies of the originals.
8. Make sure that your name is on everything that you turn in.

**Note:** The goal here is not to *reproduce* your old assignments but to *make them look better*. This means that the formatting of your write-ups do not have to be exactly the same as the original. Take advantage of the strengths of  $\text{\LaTeX}$  to produce attractive work!
